Business Lab	History of Business	Accounting/ Business Law	E-Myth	Fundamentals of Business
Math Lab	Students have access to this class every day they are on campus at NEXT Education. Each student should come prepared to complete math homework during this time. Depending on student needs, the tutor may address the entire class for a short period of time, and may address individual questions submitted by parents or students, or simply observe the work to suggest good math practices to students. Tutors give parents and students a good example of appreciation for math and its application to the sciences and other fields. Plus, students and parents have the peace of mind of knowing they have support for mathematics study.			
Electives	Economics	Philosophy	United States Government Mock Trial	Logic

This grid represents the classes we plan to offer on a rotating basis. Students may start in any “Year.”
